Power

Same old story but it feels like the first time
such a sad sad day
changed my life I'm getting high while there's still time
in a cool cool way

you are all that we need
we are all that you need

same old lonely but it feels like a good time
are you with me now
save my life move on up to the front line
can you feel my power

you are all that we need
we are all that you need
You've got the power can you feel it power
can you feel it power
can you feel it power

red white black green we're all making love
and it don't mean a thing
we say there's hope there's dope
there's no way I can cope
I reach a little higher and there's no end to this rope

you've got the power can you feel it power
can you feel it power
can you feel it power.
